## INTEROFFICE MEMORANDUM

DATE: May 5, 1997  
TO: Distribution  
FROM: S. M. Nesta, National Environmental Policy Act, T130C, X6386   
SUBJECT: REVIEW OF THE BUILDING 779 DECOMMISSIONING OPERATIONS PLAN - SMN-095-97

---

The Site is proposing to decommission the 779 cluster of buildings as described in the attached *Decommissioning Operations Plan (DOP)*. Decommissioning of most Site buildings is covered by the *Decommissioning Program Plan* you recently reviewed. However, six building clusters considered more complex than the others (371, 707, 771, 776/777, 779 and 991) will have individual decommissioning operations plans prepared to describe the particular activities they will require.

This document has been submitted to RFFO and to the Kaiser-Hill team for concurrent review and comment. Because of the project schedule, it appears that we will not have a second review to confirm that our comments have been included. Therefore, I ask that you submit comments on a Document Review Form, a copy of which is attached. I will forward completed forms directly to the RMRS Project Manager for transmittal to RFFO. Project management requires that comments be delivered no later than May 15. It is expected that RFFO will submit the final Bldg. 779 DOP on approximately May 20.

It is important that you thoroughly review this project with respect to your areas of expertise and responsibility for any issues related to project effects or compliance. If you want additional information about the project, or to submit your comments or concerns, or a statement that the project presents no issues for your area of responsibility, contact Bill Moore of Labat Anderson/NEPA.
